

Geberit AquaClean
The WC that cleans you with water.

■ GEBERIT

Modern well- being

DESIGN
MEETS
FUNCTION

Experience the Geberit AquaClean feeling.

Water is an integral part of daily personal hygiene. It cleans, refreshes and brings a feeling of well-being. In many cultures, it has long been natural to clean oneself with water after using the toilet. And in the UK, more and more people are being won over by gentle, natural toilet hygiene that uses water instead of paper. Geberit AquaClean offers you this well-being experience at the touch of a button – an experience that is beneficial, thorough and unique. Discover the WC that cleans you with water and enjoy the feeling of absolute freshness and cleanliness all day long.

Introducing the new Geberit AquaClean Tuma shower toilet a compact all-round solution. This smart product combines simple yet elegant design with revolutionary technology. As an alternative to the WC complete solution, the Geberit AquaClean Tuma is also available as a WC enhancement solution for retrofitting.

New

Revolutionary technology 8

Geberit has spent the past 40 years fine-tuning the shower function and spray – the centrepiece of any shower toilet – to absolute perfection.

Geberit AquaClean Sela 22

Created by designer and architect Matteo Thun, the Geberit AquaClean Sela fits into virtually any bathroom environment thanks to its clear, simple design.

Geberit AquaClean Mera 14

The Geberit AquaClean Mera – a masterpiece of function and design, ready for you to discover.

Easy Installation 24

Whether you are having a brand new bathroom designed or renovating an existing one, Geberit AquaClean shower toilets can be combined with all Geberit installation and flushing systems.

Why choose a shower toilet from Geberit?

Because only water leaves you really clean.

Cleaning your hands with just paper and wet wipes or even wiping yourself clean instead of taking a shower – most people would probably never consider doing either of these things. Taking a shower is simply part of our daily life. And let's be honest, do you really feel clean after wiping yourself with toilet paper?

The idea of cleaning sensitive, intimate parts of the body with water is nothing new, which is why in many countries you will often find a bidet or a water hose next to the WC.

Geberit's shower toilets cleverly combine the functionality of a WC and a bidet, allowing you to stay sitting comfortably after using the toilet and enjoy a feeling of freshness and cleanliness at the touch of a button. What's more, thanks to their perfect blend of design and technology, the Geberit shower toilets do not take up any more space than conventional WCs.

High level of water safety

Thanks to an integrated water supply, the Geberit AquaClean shower toilet range conforms to all of the relevant British and European standards. This will ensure that it will never lead to any contamination of the drinking water network.

Revolutionary technology. For enjoying those moments of well-being.

At Geberit's head office in Rapperswil-Jona, Switzerland, we have spent the past 40 years developing shower toilet technology and fine-tuning our products to absolute perfection. As a result, the Geberit AquaClean shower toilets offer an abundance of patented technology along with an impressive level of comfort and sophistication.

Flow technology, acoustics and ergonomics combined to provide superior comfort

With its pulsating shower spray, our patented WhirlSpray shower technology provides a thorough yet gentle clean, saving water in the process. The innovative TurboFlush technology, featuring Geberit's specially developed asymmetrical inner geometry for the ceramic pan, enables the toilet to be flushed out extremely thoroughly. Thanks to the cleverly thought-out acoustics, the odour extraction and flushing out functions are also exceptionally quiet. The ergonomic design of our WC seats, which are made from high-quality materials, is based on extensive form studies and tests.

The perfect blend of design and technology

The miniaturisation of technology has enabled us to develop streamlined shower toilets with a simple yet elegant design. All power and water supply connections are incorporated into the shower toilet housing, where they are hidden from view. The easily accessible modular technology makes installation and maintenance straightforward.

In terms of hygiene and cleanliness, Geberit makes no compromises when it comes to creating its AquaClean shower toilets. The AquaClean range is characterised by high-quality materials, smooth lines and seamless transitions. The only corners and edges to be found are in places where soiling is simply not possible. The approach of integrating the technology allows inaccessible areas to be kept to a minimum and hidden accumulations of dirt to be avoided, while the special surface coating ensures that any dirt or flush water runs off completely. This gives bacteria and germs absolutely no chance to build up. The ergonomically enhanced seat position also prevents any traces of dirt from collecting in the ceramic pan by channeling them into the trap. This product concept ensures that there is never any doubt over hygiene and cleanliness – they simply come as standard.

Hygiene, made easy. Cleanliness without compromise.

A powerful rinse clean

Geberit's AquaClean shower toilets also offer unbeatable performance when it comes to flushing out. The innovative TurboFlush technology, featuring Geberit's specially developed asymmetrical inner geometry for the ceramic pan, enables the toilet to be flushed out efficiently even with a partial flush. This is achieved with just a single water release point on the side and targeted flush water flow guidance. This technology is not only much more effective than conventional flushes, it is also considerably quieter and more economical. Another advantage of this thorough flushing out is that the amount of cleaning required is significantly reduced. With the TurboFlush technology, there is no need to give the trap a vigorous brush or to use aggressive cleaning agents.

Perfect hygiene is also guaranteed by the Rimfree® open flush pan design. Thanks to its efficient water guide, the entire inner surface of the ceramic pan is rinsed clean. Rimfree® WCs are therefore visibly easier to care for than conventional models. The rimless design means there are no hidden sections where deposits can form and build up. The superb flush technology features a patented flush guide, ensuring a dynamic and powerful flushing out even with a partial flush.

A specially developed descaling programme covers all water-bearing components. Displays on the remote control or control panel indicates when descaling is required.

No surfaces for dirt to cling to

The spray arm and spray nozzles on the AquaClean shower toilets are washed automatically. They are always kept clean because they are rinsed with fresh water before and after every use. An additional external supply of water is provided via a washing chamber to clean the spray nozzle when it is not in use and the entire spray arm as it extends and retracts. This significantly reduces the amount of manual cleaning required.

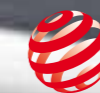

The spray nozzle and spray arm on the AquaClean Mera can easily be removed, cleaned and replaced as required.

The QuickRelease function for the WC seat and lid also ensure ease of use, allowing for practical cleaning in just a few simple steps.

Design and comfort.

Virtually unbeatable in terms of comfort and sophistication, the Geberit AquaClean Mera looks elegant and gives the impression of weightlessness.

Geberit AquaClean Mera

Exceptionally brilliant.

The Geberit AquaClean Mera is the epitome of timeless elegance. This compact shower toilet blends emphatically yet harmoniously into any bathroom environment and is characterised by high-quality materials, smooth lines and seamless transitions.

The Geberit AquaClean Mera doesn't reveal much at first glance: all of the power and water supply connections are incorporated into the housing. On the inside, it's full of revolutionary technology. The Geberit AquaClean Mera complete solution takes the comfort and convenience of a shower toilet to a whole new level. Its sophisticated technology and stylish design complement each other perfectly, so cleaning with water will simply become a matter of course.

To guarantee absolute comfort from start to finish, this shower toilet boasts an innovative hybrid hot water system consisting of a continuous flow heater and a storage water heater. This makes it possible to quickly supply water at body temperature.

WhirlSpray shower technology

The patented WhirlSpray shower technology features two nozzles and ensures an extremely targeted and thorough clean. This is made possible by a pulsating shower spray that is enhanced by dynamic aeration. The benefits are impressive: a more efficient clean and a pleasant shower experience with reduced water consumption.

→ www.geberit-aquaclean.co.uk/mera

TurboFlush technology

The innovative TurboFlush technology, based on the asymmetrical inner geometry of the rimless ceramic pan developed by Geberit, enables the toilet to be flushed out extremely thoroughly and quietly. This is achieved with just a single water release point which provides optimal flush water flow guidance. The high-quality ceramic pan is finished with a special surface coating to prevent any build-up of dirt. Inaccessible areas are kept to a minimum, while edges and corners have been dispensed with completely.

Geberit AquaClean Mera

A top product available in two designs.

↑ The Geberit AquaClean Mera comes in two different designs: while the AquaClean Mera Classic is already equipped with a complete and impressive range of features, including odour extraction and a warm air dryer, the Comfort model offers even more comfort functions.

- | | |
|--|--|
|  WhirlSpray shower technology with five adjustable shower pressure settings |  WC seat heating (only available on the AquaClean Mera Comfort) |
|  Rimless ceramic pan with TurboFlush technology |  Dryer |
|  Intuitive and clearly laid-out remote control |  Odour extraction |
|  Orientation light in a range of colours (only available on the AquaClean Mera Comfort) |  Touchless WC lid automatic function (only available on the AquaClean Mera Comfort) |
|  Individually adjustable spray arm position |  QuickRelease function for the WC lid and seat |
|  Adjustable water spray temperature |  User detection |
|  Oscillating spray |  Descaling function |
|  Gently cleaning lady wash |  Energy-saving function |

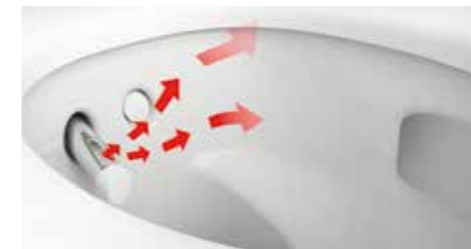

Lady wash

The Geberit AquaClean Mera has a separate lady wash, which offers a particularly soft shower spray. Its nozzle is hidden away in the spray arm, keeping it hygienically clean and protected when not in use.

Odour extraction

Automatically activated, low-noise odour extraction eliminates unpleasant odours right where they come from: inside the ceramic pan. The air in the ceramic pan is purified by a long-lasting ceramic honeycomb filter.

Dryer

The dryer arm automatically aligns itself with the last position of the spray arm to ensure an optimal drying performance. The intelligent dryer functionality takes into account the change in the skin's sensitivity to heat as it dries.

WC seat heating

The high-quality ergonomic WC seat features integrated heating. Thanks to the proximity sensor, the WC seat only starts warming up as you approach it.

Orientation light

This discreet light attracts attention and serves as a guide at night. The atmospheric LED light beam, which is activated by the proximity sensor, shines in one of seven individually selectable colours and five levels of brightness.

Remote control

In addition to the remote control, Geberit also provides a wall-mounted control panel for operating the shower toilet. Both these products offer a clearly laid-out display of the available functions. All the input can be entered with just one hand, and all it takes is a click of a button to call up your personal water temperature, spray intensity and spray arm position settings. The elegant remote control sits comfortably in your hand and is intuitive to use. The wall-mounted control panel is cable-free and can therefore be placed anywhere on the wall.

The new Geberit AquaClean App offers another simple and straightforward way to operate the AquaClean Mera. As well as a remote control function, the app boasts a variety of other setting options. For example, it can be used to take your personal settings with you on your travels and apply them to other AquaClean Mera WCs. The app is available as a free download in the iTunes App Store and the Google Play Store.

Geberit AquaClean Tuma

Surprisingly versatile.

The new Geberit AquaClean Tuma offers freshness and comfort for every home and makes optimum use of space thanks to its compact form. With its attractive design cover, which is available in various colours and materials, gives even small bathrooms enhanced aesthetic appeal and transforms them into an oasis of well-being in no time at all. All the benefits of cleaning with water can therefore be enjoyed without having to make any major structural alterations.

↑ AquaClean Tuma WC enhancement solution with a standard ceramic pan

The Geberit AquaClean Tuma is available as a complete solution with a perfectly matching ceramic pan and concealed power and water supply connections. As an alternative option, the AquaClean Tuma is also supplied as a WC enhancement solution, which comes with the same functions as the complete solution and can be retrofitted to various pre-installed ceramic pans.

The installation of the enhancement solution is quick and easy requiring no structural alterations. The enhancement solution is therefore the perfect and flexible option for anyone who wants to upgrade their existing toilet and enjoy that unrivaled feeling of freshness and cleanliness.

There are few bathroom design in which a Geberit AquaClean Tuma cannot be installed.

Geberit AquaClean Tuma

Freshness and comfort for every home.

The Geberit AquaClean Tuma is distinguished by its combination of simple yet elegant design with sophisticated, innovative technology.

- 1 Remote control 
- 2 WhirlSpray shower technology 
- 3 Lady wash 
- 4 Dryer 
- 5 WC seat heating 
- 6 Odour extraction unit 
- 7 Rimless ceramic pan 
- 8 SoftClosing 

Rimless ceramic pan, dynamic flush performance and effective cleaning

With the Rimfree® ceramic pan, the Geberit AquaClean Tuma meets the latest standards in terms of hygiene and easy care. The flush technology with a flush guide ensures that the toilet is flushed out completely and dynamically even with a partial flush.

The rimless ceramic pan is also very easy to keep clean thanks to its seamless transitions and easily accessible surfaces. The Geberit AquaClean Tuma shower toilet therefore fulfils modern hygiene requirements.

Like the AquaClean Mera, the AquaClean Tuma features the patented WhirlSpray shower technology, which provides a particularly comfortable clean while saving water at the same time. A more efficient clean and a pleasant shower experience with reduced water consumption are the main benefits offered by the Geberit AquaClean Tuma.

Geberit AquaClean Sela

Beautifully clever.

Created by designer and architect Matteo Thun, the Geberit AquaClean Sela fits into virtually any bathroom environment thanks to its clear, simple design. This shower toilet cleans you with a gentle, airy water spray at body temperature. The intensity can be adjusted to one of five levels, while the oscillating spray arm provides a particularly beneficial clean.

The Geberit AquaClean Sela is available as a wall-hung or a floor-standing solution to suit any bathroom concept. Both versions come with a remote control and an ergonomic and exceptionally comfortable WC seat.

Easy Installation.

Solutions for every construction situation.

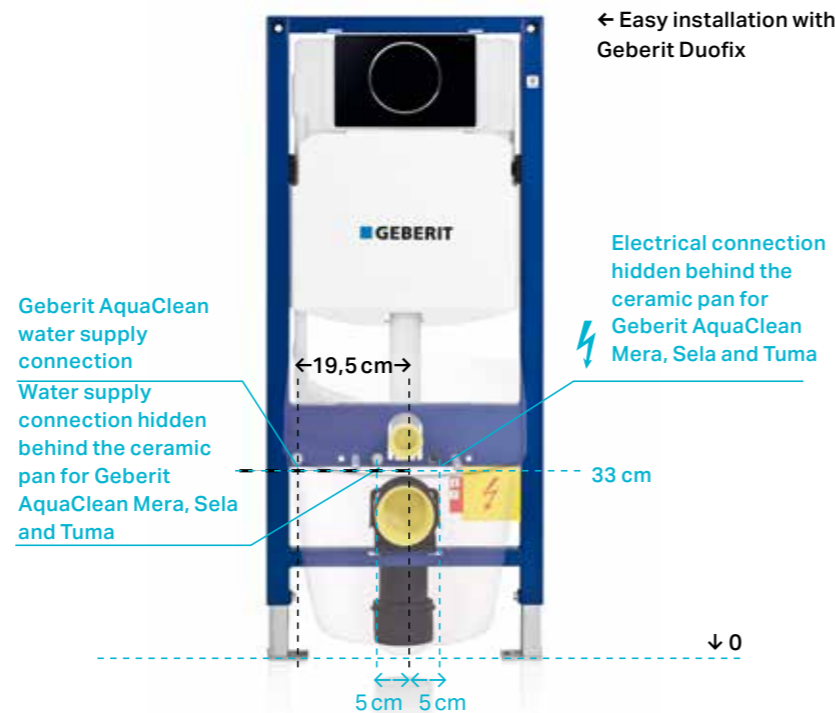

There are few construction situations in which a Geberit AquaClean shower toilet cannot be installed. All you need is connections to the power and water supply.

Geberit Duofix

Whether it is for a new construction project or a complete renovation, the Geberit Duofix with a concealed cistern offer a reliable solution. Since all the necessary connections have already been planned in, all AquaClean shower toilets can be installed and linked up to the power and water supply without any problems.

With a solution for all bathroom designs, Geberit Duofix is the backbone to any concealed wall-hung WC installation and can be installed pre-wall or into dry wall installations, giving you design freedom without having to worry about structural building work.

Whether it be installing the WC under a window, or moving it into a corner to make better use of the space, to needing odour extraction for a cloakroom, the Geberit Duofix range is so comprehensive there is a frame for all applications.

↑ Geberit Duofix for wall-hung WCs features a concealed cistern and offers a tried-and-tested solution for bathrooms of all sizes. All the necessary fitting points are planned in advance, so connecting any AquaClean model to water and power supply is quick and easy.

Geberit Monolith sanitary module

If there is already a cistern in front of the wall or it is just not possible to conceal the cistern inside the wall due to either time, budget or the basic structure of the building, the Geberit Monolith sanitary module offers a further alternative. Hidden beneath an elegant glass surface is an ultra-slim cistern and all the required sanitary technology. The Monolith is designed to be mounted quickly and without much effort and can be connected to existing water supply lines and waste pipes. This can be an ideal solution if you want to keep the beauty of existing wall work or want to add a modern twist to your dream bathroom.

The Geberit Monolith Plus offers extra comfort features, including effective odour extraction with a long-lasting ceramic honeycomb filter, an individually programmable LED orientation light and soft-touch operating buttons. This model is particularly suitable as an upgrade for a floor-standing Geberit AquaClean Sela shower toilet. With matching Geberit Monolith sanitary modules for washbasins available, bathrooms can be furnished in a thoroughly modern style, creating a harmonious look.

Sustainable innovations.

Plenty of good reasons to choose Geberit AquaClean.

Geberit has regularly been awarded top marks for sustainability. All products and production processes are checked with regard to their environmental friendliness, efficient use of resources and durability during the development stage and optimised throughout their entire life cycle.

Geberit only uses high-quality materials, such as duroplast for the WC seat and ASA for scratchproof, non-fading visible parts. Geberit offers its end customers a two-year warranty as standard, starting from when the product is installed. During this period, it will replace faulty parts free of charge.

Provided that the product has been installed by a professional and registered, Geberit will extend the warranty by a further year for defective parts. Information on warranty registration can be found at www.geberit-aquaclean.co.uk

Geberit also offers guaranteed spare parts availability for all components for minimum ten years.

European market leader

Geberit is currently the leading provider of shower toilets in Europe and boasts over 40 years of experience in developing and manufacturing these sanitary solutions.

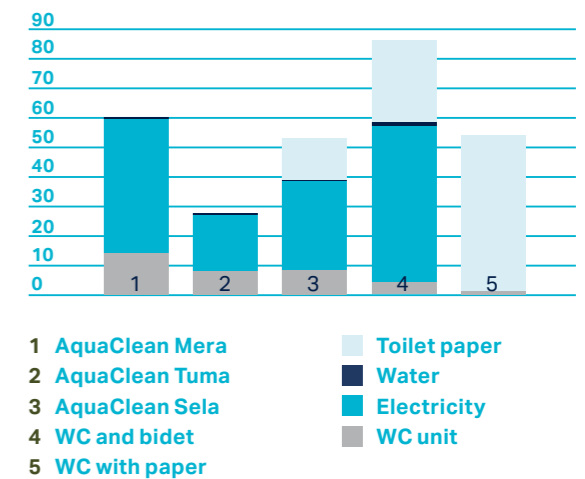

Geberit has its own research and development facilities in Switzerland and now markets AquaClean products in 13 European countries.

↑ The Mera river's head-stream in Switzerland, embodies the freshness and cleansing power of water and is a perfect eponym for the Geberit AquaClean Mera shower toilet.

Sustainable products. For sustainable construction.

In terms of environmental footprint, Geberit's shower toilet complete solutions deliver outstanding results and are comparable with conventional toilets requiring the use of toilet paper. Compared to the consumption of paper, the additional water used by a shower toilet is only a minor factor, whereas the production of toilet paper and the power this consumes play a more significant role. Geberit AquaClean products allow users to save more energy by individually adjusting the product settings, thus reducing their environmental impact even further. In standby mode (economy mode), all AquaClean models consume no more than 0.5 watts of energy when in use. All Geberit AquaClean models come with an economy mode and comply with the European Ecodesign Directive.

Geberit AquaClean shower toilets compared to conventional toilets, electricity, toilet paper and bidets

The graph shows the environmental impact estimated using the IMPACT World+ method.

We make you happy. Top customer satisfaction.

We have put a smile on the faces of more than a million customers with our shower toilets and we aim to continue doing so. Every day, we carry out research and develop products with comfort in mind – and our efforts are paying off: over 80% of our customers would recommend Geberit AquaClean. Would you like to make an appointment for a consultation or try out our products?

Visit our website → www.geberit-aquaclean.co.uk to find your nearest retailer for a consultation.

“The Sela toilet has been a particular hit with our 11-year-old son. Now he loves using the toilet in the en-suite and I can be confident that he’s always clean between showers!”

Komal Passi, from West Yorkshire

“When you use it, there is nothing else like it – you feel clean and fresh, and using water to clean feels so much nicer on your skin than toilet paper.”

Michael Leigh, from Blackpool

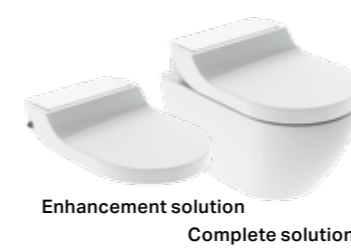

“After suffering with Carpal Tunnel and noticing the mobility in my hands decreasing, I’ve realised it is easy to take everyday tasks for granted. However, since we had our Geberit AquaClean installed a couple of months ago it has been a revolution for both my husband and I.”

Fulvia Schiff-Gent, from Manchester

“We’d never really considered having a shower toilet before, but now we’ve had it for a few months, it’s wonderful and we’ve had no problem at all! Should we ever choose to move house in the future, we will take the AquaClean with us!”

John Flint, from Stockport
